Nifty opened higher, made a new all-time high of 23664 from where selling emerge which led nifty to close in red. On the daily chart, we are observing seven consecutive narrow range body formation, which suggests that markets are circumspect at higher level. In coming trading session if nifty trades above 23570 level then it may test 23600 - 23690 levels. On the downside, 23400 - 23290 levels may act as support for the day.

At present, looking at the current price action, it is evident that a consolidation or minor pull back of prior uptrend could be possible. Hence, one can adopt cautiously positive approach at current level, as stock specific activity is likely to continue.
