Market Technical Outlook

Nifty opened on a subdued note but witness upside momentum in the final hour of the trading session which led nifty to close in green. On the daily chart, we are observing that prices made a new all-time high of 22215 and formed a positive candle. This suggests that upside momentum is likely to continue. In coming trading session if nifty trades above 22215 level then it may test 22300 – 22400 level. On the downside, 22100 – 22000 levels may act as support for the day.

We maintain our stance that the sentiments are positive and even the breath of the market is positive. Hence, momentum on the upside is likely to continue. However, stock specific activity is likely to continue.
