Market Technical Outlook

The Nifty opened higher traded in a narrow range with positive throughout the day to close in green. On the daily chart, we are observing a narrow range body formation, which suggests indecisiveness prevailing at current level. In coming trading sessions, if Nifty trades above 24700 level then it may test 24760 – 24840 levels. On the downside, 24550 – 24460 levels may act as support for the day.

Broadly, looking at the current price action it is evident that the 50-days SMA (24183) remains crucial support for the prices. Hence, one needs to adopt a cautiously positive approach at the current level, as stock-specific activity is likely to continue.
