Market Technical Outlook

Nifty opened higher, traded in a narrow range with positive bias to close in green. On the daily chart, we are observing three consecutive narrow range body formation with higher highs. This suggests that momentum on the upside is likely to continue. In coming trading session if nifty trades above 22450 level then it may test 22510 – 22600 levels. On the downside, 22300 – 22190 levels may act as support for the day.

We maintain our stance that looking at the bullish piercing pattern and prices, which has closed above the 50-days SMA (22203) & 20-days SMA (22359), there is high probability that momentum on the upside may continue. Hence, one needs to adopt cautiously positive at current level.
