Market Technical Outlook

The Nifty opened lower and traded in a narrow range throughout the day, closing in the red. On the daily chart, we are observing an inside day formation, suggesting that the market is circumspect at current levels. In the upcoming trading sessions, if Nifty trades above the 24,450 level, it may test the 24,520 – 24,610 levels. On the downside, the 24,310 – 24,200 range may act as support for the day.

Broadly, for the second consecutive trading session, prices have closed above the 20-day SMA (24,346). This suggests that the undertone remains positive. Hence, one needs to adopt a cautiously positive approach at the current level. However, stock-specific activity is likely to continue.
