### Market Technical Outlook

The Nifty opened lower but managed to recover most of its losses throughout the day, closing slightly in the red. The daily chart shows a narrow range body formation, closing above the 20-day SMA (24373), indicating a positive market undertone. In the upcoming trading sessions, if Nifty trades above the 24,430 level, it may test the 24,510 – 24,600 levels. On the downside, the 24,320 – 24,210 range may act as support for the day.

**Broadly, for the third consecutive trading session, prices have closed above the 20-day SMA (24,373). This suggests that the undertone remains positive. Hence, one needs to adopt a cautiously positive approach at the current level. However, stock-specific activity is likely to continue.**
