Market Technical Outlook

Nifty opened higher but was unable to sustain the opening gains and selling in the latter half of the session dragged nifty to close in red. On the daily chart, we are observing a narrow range body formation, which suggests indecisiveness prevailing at current level. In coming trading session if nifty trades above 22480 level then it may test 22530 – 22610 levels. On the downside, 22340 – 22260 levels may act as support for the day.

We still maintain our stance that looking at the bullish piercing pattern and prices, which has closed above the 50-days SMA (22235) & 20-days SMA (22403), there is high probability that momentum on the upside may continue. Hence, one needs to adopt cautiously positive at current level.
