## Monthly Market Roundup

In July 2020, Domestic market moved positively with benchmark Sensex and Nifty Index both ending the month with 6.2% gains. During the July month, market continued to be volatile amid Corona crisis. On the back of expectation of normal to excess rainfall in FY21 with higher Kharif sowing, surplus trade balance in June 2020, improving Economic indicators from the lows of March & April and Q1FY21 earnings so far boosted market rallies. As a result of rise in Covid cases, various cities in India were put under lockdown again, causing further disruptions in businesses. Investor sentiment has turned cagey on concerns that Economic recovery in the India and globally is not as strong as expected. The general aversion towards riskier bets in the market saw investors shift to defensive sectors such as Information Technology, Pharmaceuticals and Fast-Moving Consumer Goods. Gold surged to its life time highs crossing \$1940 per ounce which indicates that the prices of gold are going to remain strong despite volatile Equity Market. The overall risk reward is unfavourable. Hence, one needs to remain cautious on markets.

### Sectoral Performance

On the sectoral front, IT index has outperformed the other indices with Pharma, Auto and metal ended in the green, while selling witnessed in the Nifty Bank & PSU Bank and Media sector. Nifty IT was the best performing sector which rose by 22.7%, followed by Nifty Pharma with 12.8% gain and Nifty Auto at 8.4% gain for the month. Other major sectoral indices saw positive momentum during the month of July. Nifty Metal index gained 7.5%, followed by Nifty Energy, which rose by 5.8% and Nifty FMCG at 2.1% gain. Nifty Realty index was almost flat. Due to rising pressure in the banking sector on the wake of lower credit growth and expectation of spike in bad loans, Nifty Bank, Nifty PSU Bank and Nifty Financial services index declined by 1.5%, 4.6% and 1.1%.

## RBI's MPC meeting scheduled on August 6 for policy rate decision

As per Economist expectation, Reserve Bank of India in its Monetary Policy Committee is expected to leave the repo rate unchanged at 4%, due to rise in inflation during the lockdown. As per National Statistical Office, CPI inflation for the month of June was at 6.09%. Further decision on moratorium is likely to be announced. Going forward market will continue to track global as well as domestic factors such as increase or decrease of Covid-19 infection, rupee movement, crude oil prices, and inflow & outflow of foreign fund among others.

### On the global front

Despite the uncertainty about the Covid-19 pandemic looming at large, US indices such as Dow Jones, Nasdaq and S&P 500 gained by 2.7%, 5.8% and 5% during the month of July. Tension between US-China and increasing number of Covid cases is negative for the market. The US economy suffered its worst fall since the Great Depression falling 32.9% in Q2CY20. Most of the decline in activity came in April as the country closed down non-essential businesses. The job layoffs during this period drove the unemployment rate to a record 14.7% that month. On July 29<sup>th</sup>, Federal Reserve left the benchmark interest rate unchanged near zero and reiterated a pledge to use full range of tools to support the economy battered by Coronavirus pandemic. The flash IHS Markit Eurozone Composite PMI rose further from the all-time low of 13.6 in April 2020, climbing from 48.5 in June 2020 to 54.8 in July 2020. In the July month where some rebound seen but there's a long way to reach the output to Pre-Covid levels.

## Arihant AMC Portfolio Performance

Particulars	1 Month	3 month	6 month	Since Inception (04-Oct-2019)
OPPORTUNITY & GROWTH STRATEGY	5.46%	11.08%	-9.32%	-5.14
S&P BSE 200	6.81	12.38	-7.70	-1.49

US' Nasdaq +6%, US' Dow Jones & Nasdaq closed in positive territory with 2.7% & 5.8% respectively. Whereas, Japan's Nikkei and FTSE 100 closed with a fall of 1.9% & 4.2% in the month of July.

## Economic Data Wrap Up: July

- India's June Nikkei Services PMI surged to 33.7 in June from 12.6 in May.
- India's June Trade Balance at surplus of \$0.79bn as against the deficit of \$3.15bn in May.
- India's June WPI inflation declined to 1.81% as compared to 3.21% in May.
- India's June CPI inflation came in at 6.09%.
- India's May IIP at -34.7% as compared to -57.6% in April.
- India's July Nikkei Markit Manufacturing PMI declined to 46.0 from 47.2 in June.

## Nifty Technical Outlook: Aug - 2020

On the monthly chart, we are observing a strong bull candle which has closed above the median line of the channel (shown above in the graph). In coming month if Nifty trades and close above 11269 levels then it is likely to test 11573 - 11877 - 12232 levels. However, If Nifty trades and close below 10877 level then it can test 10573 - 10269 - 9916 levels.

At present the monthly trend is up. Hence, near 10800 - 10573 levels there is high probability that buying may emerge which could propel Nifty to test 11500 - 11877 levels. Hence, one needs to adopt cautiously positive approach at current level as stock specific move is likely to continue.

## IDFC First Bank Ltd

BUY

Target Price: Rs. 39

### Value Parameters

BSE Code	539437
NSE Symbol	IDFCFIRSTB
CMP (As on 04 <sup>th</sup> Aug, 2020)	Rs. 27
Face Value	Rs. 10
52 Week High / Low	48/18
Market Cap (Rs bn)	15,145
BVPS (FY22E)	Rs. 34

### Company Overview:

IDFC First Bank was formed from the merger of IDFC Bank & Capital First Ltdw.e.f. From Dec 2018. The erstwhile IDFC Bank, a subsidiary of IDFC Ltd which got its banking license from RBI in 2014 following which it then demerged its infrastructure assets to form the new IDFC Bank. The bank then continued its legacy portfolio of assets to grow as an infrastructure financier cum bank. On the other side, Capital First Ltd, a mostly retail consumer loan financing NBFC came up with a zero-cost financing model. Today, after a year since the merger, the IDFC FIRST Bank is competing with other larger peers in order to gain market share in the retail lending business. We see a massive change in the portfolio mix of the bank underway re-establishing

### Shareholding Pattern % (Jun - 20)

### Investment Rationale

**Fastest Realization seen in any bank:** IDFC First Bank's portfolio consisted of a mere 34.6% of assets from retail funded assets by Dec 2018 and increased it to 53.6% by end of

March 2020. While the bank envisages to see a 70% retail asset book in 5 years (since merger), we believe it is on the right track to achieve those numbers quite ahead of its set deadline and outgrow its own size before the targeted 5 year's time.

**Immensely high yields from retail segment:** IDFC First Bank's yields from retail assets range around ~16% against a ~10% yield from wholesale assets, thereby providing both an opportunity as well as beneficial for the management to skew the mix favouring retail segment.

**Lower risk going ahead; asset quality to only improve in future:** The bank's asset quality will be witnessing a gradual & stable improvisation apart from expected Covid impacted stress as it keeps a tab on incremental corporate loans, exits from infrastructure lending and a more reliable and credit conscious retailers start banking with it.

**Legacy book concerns addressed & well provided off:** IDFC FIRST Bank has already provided healthy percentage for the legacy wholesale assets (infra, telecom, logistics company, etc.) with PCR levels at 64.5% by March 2020. The bank has been upfront to provide by 49% for several wholesale assets under watch-list comprising a total of Rs 3,205 Cr exposure towards these watch-list accounts.

### Outlook and valuation

IDFC First Bank is one of the fastest growing retail Bank with 503 branches (up 39 from 464 branches in Q4FY20) across the nation. Despite the pandemic the bank expanded its branch count by 39 during Q1FY21. The bank is focused in servicing the retail segment of consumer lending business and will witness focus on retail asset quality going ahead. The bank's NIMs and overall yields are expected to increase further in the future due to its increasing retail segment. IDFC First Bank is currently trading at a much cheaper valuation of 0.84x P/Adj. BV FY22E. Historically, the bank has traded at a mean Forward P/BV of 1.32x since its listing in 2015. We have a Buy rating on the stock with a target price of Rs 39, valuing it at P/adj. BV multiple of 1.2x on FY22E adj. BV of Rs 32.3 per share.
