ets opened on a subdued note, traded in a narrow band shout the day with negative bias to close red. On the sectoral Metal, Oil & Gas and Power ended on the loser side whereas ncare and Capital goods ended with decent gains. The advance e ratio was in favour of advancing counters (Advances = 1444 nes = 1034).

rn Formation: On the daily chart, we are observing narrow range body formations for two consecutive trading sessions. This suggests indecisiveness prevailing at current level. However, the momentum oscillators are still positively poised.

Future Outlook: Looking at the current price action and the placement of the momentum oscillator we are of the opinion that momentum on the upside is likely to continue. In coming trading session if for the first hour if indices trade above 6310 level then on the upside indices are likely to test 6350 - 6380 levels. On the downside 6230 – 6180 may act support for the day.
